### TREATMENT ADD-ONS

#### PROFESSIONAL CHEMICAL PEEL ADDITIONAL \$65 (30 MIN.)

The prospect of stripping away years of skin damage in a non-invasive, virtually painless way is universally appealing. That's why chemical peels are so popular for treating signs of skin aging.

But what about the downtime? With today's innovative technology, we're happy to report that the latest peels result in little to no downtime at all! They're also far more powerful.

Professional chemical peels are applied by skin therapists, estheticians or medical practitioners who use highly-concentrated exfoliants. Chemical peels can be performed as outpatient procedures, but they tend to result in noticeable skin flaking, peeling or downtime, depending on the strength of the peel. To minimize downtime, and deliver the best results, a series of peels are usually performed over a six- to 12-week period, followed by maintenance twice a year.

**Do you need a chemical peel?** If you are concerned about dullness, aging or acne and want brighter, smoother skin, talk to your professional skin therapist about chemical peels. They will be able to guide you toward the best type of peel for your skin and lifestyle – and help you get the results you want.

#### BACK FACIAL \$95

Beneficial for both men and women in cleansing those tough-to-reach spots targeting a variety of skin care needs such as detoxifying clogged pores, back acne, and dehydrated skin. This treatment mimics many of the traditional techniques used for the face, and incorporates deep cleansing, gentle steaming to open pores and lift impurities, followed by extractions, exfoliation, and a customized mask. The back facial also includes a relaxing neck, upper back, and shoulder massage. Our licensed service providers have experience with all skin types and tones so you know that you'll leave with fresher, cleaner, and clearer skin.
